

Call for Papers:

Special Issue of the International Journal of Sustainable Business and Economics on Driving Green Innovations: Sustainable Operations and Circular Engineering in a Digital Era

Introduction and Thematic Focus

In an era defined by rapid technological leaps and critical ecological challenges, the convergence of digital transformation and sustainability is essential for long-term business resilience. Engineering practices and corporate operations must evolve simultaneously to align with global environmental mandates.

This Special Issue is organized by Research Publishing Consulting, acting as the editorial and strategic coordinator, in cooperation with Wohlebe & Ross Publishing.

We invite scholarly contributions that bridge the gap between theory and practice. The issue focuses on how industrial operations must be redefined through the lens of sustainability, and how emerging technologies can be harnessed ethically to optimize resource efficiency and support circular systems.

List of Topic Areas

We welcome original research and theoretical contributions addressing (but not limited to) the following themes:

- Strategic Innovation and Sustainable Business Models
- ESG Accountability and Digital Environmental Impacts
- Sustainable Operations and Digital Supply Chains
- Circular Engineering and Green Infrastructure Optimization
- Eco-Efficiency and Technological Progress in Production
- Renewable Energy Systems and Industrial Sustainability

Submission Formats

The journal welcomes the following types of contributions:

- **Original Research Papers:** Empirical studies providing new insights into management and leadership practices.
- **Literature Reviews:** Comprehensive overviews of the current state of research in the specified fields.
- **Conceptual Papers:** Theoretical explorations that propose new frameworks or challenge existing paradigms.

Important Dates & Timeline

- Full Paper Submission Deadline: **August 24, 2026**
- First Review Feedback: **September 7, 2026**
- Revised Manuscript Submission: **September 21, 2026**
- Final Acceptance Notification: **September 28, 2026**

About Research Publishing Consulting (RPC)

Research Publishing Consulting is a specialized academic consultancy that advises scholars and collaborates with various publishers to maximize the global impact of research. RPC provides comprehensive editorial and strategic management services, specializing in the end-to-end coordination of high-quality special issues to bridge the gap between academic research and practical business application.

About the Journal

The International Journal of Sustainable Business and Economics (IJSBE, ISSN: 3052-6752) serves as an international platform for peer-reviewed research at the intersection of ecological sustainability, engineering excellence, and business management:

- Open Access: All articles are freely accessible worldwide (DOAJ listed).
- Indexing: Indexed in ResearchGate, Google Scholar, EBSCO, and Crossref (unique DOI for all papers).
- Impact-Oriented: IJSBE specifically supports the global transfer of knowledge between research and practice.

How to Contact Us

Interested authors, institutions, or potential contributors are warmly invited to reach out to discuss their paper ideas or learn more about this Special Issue.

Contact: info@researchpublishingconsulting.com
